DuploQ Freeware DuploQ Freeware 0 by dmakitt DuploQ is a tool to help programmers locate potential duplicated code within the source code files of their application. It can detect duplicate code blocks, based on code fragment comparisons. DuploQ also provides code navigation and duplicate detection for single or multiple files. The application uses line numbers to automatically display duplicates. It produces the results as an XML file or in a more detailed format, such as HTML. DuploQ lets users customize configuration and processing parameters, so they can focus on the code fragment they wish to review. This way, they don't have to go through large files to analyze the potential duplicated code areas. You can choose to use a single project, or multiple projects to analyze simultaneously. DuploQ is language-agnostic and doesn't require any programming background, so it is easily accessible to all types of programmers. DuploQ Freeware Download Now...
